

## Our Vision for Geography

At The Roebuck School, we want to develop children's curiosity and fascination about the world and its people that will remain with them throughout their lives. We want the children to have a love of geographical learning, gaining knowledge and skills through high quality teaching both inside and outside the classroom. As the future generation responsible for our planet, we want our children to have a sense of respect for the world around them.

Our children will investigate a range of places, both in Britain and abroad to help develop knowledge and understanding of the Earth's physical and human processes.

We also provide opportunities to investigate and enquire about our local area, this will support children to develop an understanding of who they are, their heritage and what makes our local area so unique and special.

We aim to give our children strong geographical knowledge, good enquiry skills, the ability to use a range of maps, the skills to collect and analyse data and the ability to communicate information in a variety of ways.

## What does Geography look like at the Roebuck School?

At The Roebuck School, we implement a progressive geography curriculum that builds on prior knowledge and skills year on year. The geography curriculum will be taught in response to driving questions which are aimed to be challenging, inspiring, creative, nurturing and encourage active learning. The learners will revisit geographical skills and knowledge in order to embed and deepen understanding. The lessons are carefully planned to ensure that all children are well supported in their learning and that opportunities for depth is planned for. We ensure that trips and visiting experts enhance the learning experiences for the children.

# Geography

## Why is Geography important?

The children at The Roebuck School will be equipped with the geographical skills and knowledge that will enable them to be ready for life as an adult in the wider world. Whilst doing this, we aim to implement an excitement and wonder of the world. We aim for children to be passionate for geography readying them as well-informed lifelong learners in the wider world. We want our children to have thoroughly adored learning about geography, enabling them to have the desire to travel and access countries all over the world.
